DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fossum (5,995,163) in view of Dean (5,963,261).

3. As to claim 1-5, Fossum teaches a method of digital median pixels which includes a step of $(\text{mix} + \text{max}) / 2$, where min is zero value and max is the full scale (fig. 2, col. 2, lines 30-32). Accordingly, max value corresponds to a first pixel value, min value corresponds to a second offset pixel value and weighting corresponds to a predetermined amount as claimed. Therefore, Fossum teaches all of the claimed limitations of claimed 1, except for display frame. However, Dean teaches P frame 1 and P frame 2 (see figure 4). It would have been obvious to a person of ordinary skill in the art at the time of the invention to utilize the circuit in figure 1 as taught by Dean for the circuit in figure 4 as taught by Fossum because an integrated circuit that included such a circuit architecture could find use in a wide variety of display system (col. 2, lines 62-64).

4. As to claims 6-10, both Fossum and Dean teach a logic circuit as shown in figure 4 and figure 1, respectively.

5. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 form.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Nguyen whose telephone number is 703-305-6209. The examiner can normally be reached on MON-FRI from 9:00-5:00 with alternate Friday off.
